# HOW TO GET STARTED

Every day for 7 days, we will focus on one suggested micro-habit below to include into your daily routine:

Included in the workbook are tips and essential information to effectively integrate these micro-habits into your routine, resulting in a better understanding of their significance for your overall well-being.

.A quick note before we dive in:

As we go through this week, some of the steps may seem simple—perhaps even obvious. You might be tempted to skim past them because you "already know" you should be doing them. But there is a massive **difference between knowing** what to do **and actually doing** it consistently. The breakthrough isn't found in complex bio-hacks or expensive treatments; it is found in the consistent follow-through of the fundamentals.

# WHAT ARE MICRO-HABITS?

Micro habits are small, simple, and easily achievable actions that, when repeated consistently over time, can lead to significant changes in behavior and lifestyle outcomes.

Over the next few days, we aren't going to overhaul your entire life. Instead, we are going to focus on small, scientifically backed shifts that signal safety to your body and clarity to your mind.

# HOW DO YOU CREATE MICRO-HABITS?

## **IDENTIFY SPECIFIC GOALS**

The first step in developing micro habits is determining your plan and what behaviors you would like to implement in your life that will serve you. This could be anything from exercising regularly to producing a daily meditation practice. Start slow and simple.

## **BREAK DOWN LARGER GOALS INTO SMALLER, MANAGEABLE STEPS**

Micro habits work by breaking down larger goals into smaller, incremental steps that are easier to accomplish and maintain. Eg. If your goal is to commit to working out simply start by creating a habit of putting out your gym clothes the night before.

## **FOCUS ON CONSISTENCY**

The key to developing effective micro habits is consistency. It's better to perform a small daily action to create sustainability than to do a big task that will leave you feeling overwhelmed. This usually creates a feeling of pressure leading to no longer implementing the habit.

## **TRACK YOUR PROGRESS AND ADJUST AS NEEDED**

Regularly monitoring your progress will help you determine whether your micro habits are working and if you need to make any necessary adjustments. Always remember to celebrate your successes and reward yourself for your progress, no matter how small.
